Tutorial-13

Modules name:Pycharm
Test Case ID:p_13

Name: Selenium Environment setup

1. **open the pycharm**
2. **write the code**
3. **open the terminal**
4. **click on run**

Code:

```
from selenium import webdriver

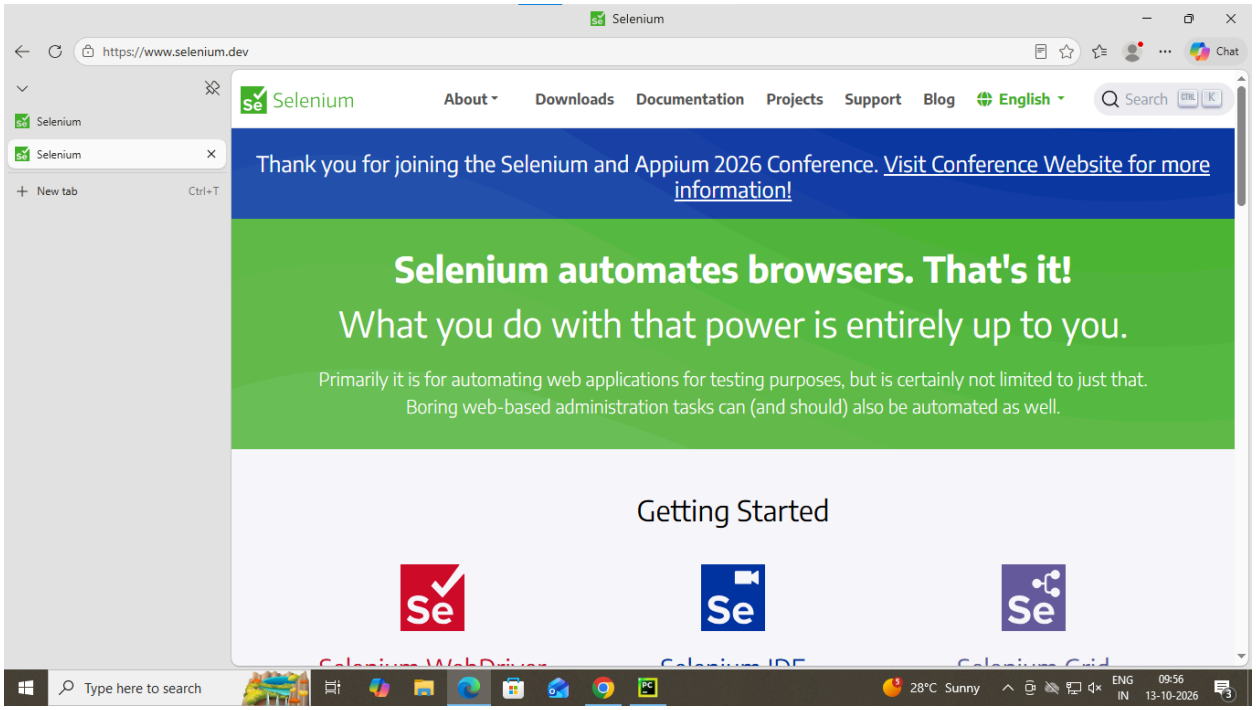

driver = webdriver.Chrome()

driver.maximize_window()

driver.get("https://www.selenium.dev/")

print("Browser launched successfully")
print("Page Title:", driver.title)
print("Current URL:", driver.current_url)

driver.quit()
```

Thank you for joining the Selenium and Appium 2026 Conference. Visit Conference Website for more information!
Selenium automates browsers. That's it!
What you do with that power is entirely up to you.
Primarily it is for automating web applications for testing purposes, but is certainly not limited to just that.
Boring web-based administration tasks can (and should) also be automated as well.
